REQUIRED IMMUNIZATION FORM

The University of Pittsburgh School of Medicine requires all visiting student applicants to provide record of the following immunizations before they can be considered for acceptance:

- Measles (2 doses), Mumps (2 doses), and Rubella (1 dose). Or the combined MMR vaccine (2 doses). We may accept titers showing immunity if immunization records are not available.

- Varicella (2 doses) or titer showing immunity

- Hepatitis B (3 doses AND a titer showing immunity are both required)

- DPT (Provide all dates of the complete series). If childhood DPT immunization records are not available, please contact visiting@medschool.pitt.edu for individual assistance.

- Tdap Adult (1 dose within the 10 years of the dates of the elective)

- Polio (Provide all dates of the series plus an adult booster)

- TB screening result from within one year of the dates of the elective. Either PPD or Quantiferon Gold is accepted. If you have tested positive for TB, you must submit documentation of a clear chest x-ray (analytical result, not the actual film).

THESE RECORDS MUST BE PROVIDED ON THE UPSOM IMMUNIZATION RECORD FORM INCLUDED IN THE APPLICATION PACKET AND BE SIGNED BY A PHYSICIAN OR OTHER HEALTH CARE PROVIDER. Please do not include additional documentation or personal health information unless it has been specifically requested.
